Marie presented an overview of the RAP Sheet, the various components of the RAP Sheet and how to interpret what you see on the RAP Sheet. She also provided a RAP Sheet broken down into the 5 main segments and explained each. She reiterated AAS-Automated Archiving System and suggested people get this to see court dispo's. Email Marie and she will direct you on how to apply. It's free. She also reiterated never to email a RAP sheet. She suggested using DATA Motion for Encryption-that is what DOJ uses. This could be used to receive a lengthy rap sheet via email. Marie also emphasized that a "name" will now be necessary for Court Detail/DA Packets, rather than just "DA" in the route field.
