Datanet Solutions, Inc. is a software development and systems integration firm, engaged in the design, development, and deployment of **Document Processing and Management Systems** for our domestic and international clients. Our work ranges from stand-alone imaging applications, to enterprise-wide client server installations, globally integrated internet based multi-tier document management systems, and custom **Scanning and Data Capture Software Development.**

In 2006, Checkmation® launched as a division of Datanet Solutions. This special distinction was granted to Checkmation® and its suite of products so that its staff could focus solely on pursuits related to the Check Clearing for the 21st Century Act. Checkmation® offers image cash letter creation and processing solutions, including Remote Deposit Capture and Remittance Processing.

## SOLUTIONS

### Document Management

Scan, Index, Store, and Retrieve. These four steps are the basics of any document management system.

Datanet Solutions, Inc. can provide you with a tailored enterprise solution to fit your specific needs and budget. This solution is scalable from one department to your entire operation, regardless of size. You can be assured that your solution will streamline your document archival process, as well as provide you with immediate access to your information.

### Check Processing / Remittance Processing

Checkmation®, a division of Datanet Solutions, offers progressive suites of Remote Deposit Capture, Remittance Processing, and Check 21 Solutions. Checkmation® solutions are designed to integrate with legacy systems and applications, and are capable of deriving all relevant data from payment items and remittance stubs.

### Forms Processing / Process Management

Scan, recognize, and automatically process the paper flowing through your business today.

This solution combines document scanning, indexing, data extraction, and data exchange in one simple process.

Information can be automatically captured from both structured and unstructured forms and documents.

Captured information and images may be shared with other enterprise systems and applications that your business depends upon.

Datanet Solutions prides itself on providing tailored solutions that meet and exceed our customers' expectations.

## SERVICES

### Professional Services

Datanet Solutions is committed to providing the best possible solutions for our customers. To this end, we offer comprehensive business process analysis, cost analysis, system design, training, and consulting services that encompass your entire Electronic Document Management System's needs.

### Scanning

Datanet's expertise extends from scanning 3x5 index cards to large format drawings. Under many circumstances, customers either do not have the time or the resources to scan documents in-house. For these customers, Datanet Solutions offers scanning, indexing, retrieval, and archival of critical documents.

### Repository Services

For customers that are concerned about the overhead costs of maintaining in-house servers and equipment, Datanet Solutions offers all of the functions and features of a robust Document Management System. The users simply require an internet connection and a browser! Datanet Solutions will take care of the rest.

### Microfiche/Microfilm Conversion

Datanet Solutions provides you with the solution and the service of converting your outdated microfiche/microfilm or aperture cards to digital formats. We use state of the art equipment to facilitate the conversion process, which translates to high quality images.
